

Fire Safety For Ambulatory Care: Mission Possible

This popular fire safety training program covers the elements needed for fire: Fuel, oxygen, heat and chemical reaction.

- Categories of fires
 - Evacuation of patients
 - Leading through fire doors
 - The swing carry
 - The two person single file carry
- (16 min) **DuPont #26-HC53-DVD**. \$345

Handbook Available.

Fire Safety in Home Health: Ten Burning Questions

This video provides a thorough review of basic fire tips, including fire prevention, fire extinguisher use and the RACE to safety. It answers the questions: why is fire safety important in Home Health and describes what providers can do to prevent fires from happening in their client's homes. Viewers will see a variety of problem situations and will learn how best to respond to them in an appropriate and diplomatic fashion.

Handbook Available.

Fire Safety for Long Term Care: When It's Not Just A Drill

This program emphasizes the importance of on-going fire awareness and following proper fire safety procedures.

- Proper staff response to training
 - Communications procedures
 - Proper use of a fire extinguisher
 - Emergency evacuation techniques
- (16 min) **DuPont #26-HC6-DVD**. \$295.

Fire Extinguishers: Your PASS To Safety

This healthcare version covers proper handling of fire extinguishers and features information on A, B, C, D and K extinguishers. It covers what types of fires and extinguishers go together, and the proper technique to be used. Discusses when to extinguish and when to evacuate.

(9 min) **DuPont #26-HC92-DVD**. \$345

Fire Safety: Mission Possible

According to the National Fire Protection Association (NFPA), about 7,000 fires in healthcare facilities are reported each year. This dramatic program defines the four different classes of fire, discusses the most common causes of fire in a healthcare environment, and details fire prevention measures and emergency response procedures.

- Fire basics
- Fire extinguishers

Two versions available: the RACE to Safety, or REACT.

Handbook and Poster Available.

eLearning Format Available.

Fire Safety: Be Alert, Not Alarmed

This program covers the following:

- The three ingredients of a fire and what happens if one of those elements is missing.
- The burning stages of a fire and how to recognize the dangers of each.
- What happens in a flashover and the consequences of not acting quickly.
- When stairs are a danger zone and what to do.
- Dangerous reactions from residents and how to manage them in a fire.

(16 min) **DuPont #26-HC75-DVD**. \$295

Handbook Available.

Fire Safety: Operating Without Fires

Provides information about causes of fires in operating rooms, how to prevent them and what to do if one occurs.

- Fire causes
- Breaking the fire triangle
- Minimizing oxidizer risks
- Minimizing fuel risks
- Minimizing ignition
- Operating room fires
- After a fire

Handbook Available.

Hospital Security: Partners Against Crime

Hospitals are the most crisis-prone workplaces in the United States. In this program, a hospital security officer teams up with the viewer to get an up-close look at security issues on the job. This program includes guidelines for dealing with safety concerns and shows how to be pro-active in high-risk situations.

- Dealing with safety concerns
- How to be pro-active in high-risk situations
- See, Weigh, Arm Yourself, Take Action (S.W.A.T.)

(19 min) **DuPont #26-HC45-DVD**. \$445

Handbook Available.

Disaster Planning For Healthcare: Defuse the Time Bomb

Whatever the disaster, your facility must react effectively to save lives, treat casualties and maintain high quality patient care. This program will teach your employees how to stay alert to preventing disasters such as fires, explosions and violence.

- Types of disasters
- Prescription for survival
- Role division
- Drill preparedness
