

### H1N1 Flu (Swine Flu): Pandemic Awareness For Healthcare

This important program will help you educate and protect your employees against a threat of the H1N1 Flu (Swine Flu). The program discusses the following important topics:

- What is H1N1 Flu and how is it transmitted?
  - What to do in case of exposure
  - Symptoms and treatments
  - Hand hygiene
- (15 min) **DuPont #26-HC103-DVD**. \$195

### Infection Control In Outpatient Facilities

Healthcare workers risk infection by Hepatitis B & C, HIV, influenza and tuberculosis each day. What's even more alarming is that these dangerous bacterial pathogens can be spread to patients, families and communities. Protect your staff with the proven infection-prevention measures included in this new program.

Topics discussed include:

- General information on BBPs
  - Infection control procedures
  - CDC Standards and Precautions
- (17 min) **DuPont #26-HC93-DVD**. \$345

**Handbook Available.**

### MRSA & VRE Precautions: Battling Superbugs

Antibiotic resistance isn't a new problem. What is new, according to the Centers for Disease Control and Prevention, is that virtually all bacteria in the world are developing resistance to the antibiotic treatment of choice. This new training program, MRSA and VRE Precautions: Battling Superbugs, trains healthcare professionals how to stop the spread of antibiotic-resistant bacteria. MRSA and VRE Precautions: Battling Superbugs highlights:

- Adherence to contact precautions
- Identification methods
- Patient treatment procedures that slow transmission and lower infection rates
- Hygiene and equipment decontamination that saves countless lives!

(17 min) **DuPont #26-HC87-DVD-R**. \$445

**Handbook Available.**

**eLearning Format Available.**

### HIV/AIDS: What Caregivers Need to Know

Educate your employees on what they can do to ensure their safety from HIV exposure and infection.

- Definition of HIV
- When HIV becomes AIDS
- Symptoms
- Types of exposure
- Standard precautions

(16 min) **DuPont #26-HC72-DVD**. \$345

**Handbook Available.**

### Healthcare-Associated Infections: Prevention and Control

This new video covers the growing prevalence of Hospital Acquired Infections, and how to prevent their spread in the hospital environment. Includes details on the following:

- What are HAIs? Covers Multi-drug resistant Organisms, in particular: MRSA
- What Causes the Most Common HAIs?
- Goes into depth on Catheter-associated urinary tract infections;
- Central line--associated bloodstream infections - or BSIs -
- Surgical Site Infections - or SSI's
- Ventilator-Associated Pneumonia - VAP
- How Can We Prevent and Control Healthcare-Associated Infections?

Describes these infection control measures: Standard Precautions; Contact Precautions; Hand Hygiene: Transmission-Based Precautions; Contact Precautions; Airborne Transmission; Droplet Precautions.

(19 min) **DuPont #26-HC88-DVD-ITE**.

\$445,

**Handbook Available.**

### Avian Flu & General Pandemic Awareness

Avian Flu & General Pandemic Awareness provides a detailed look at what healthcare facilities can do to limit transmission of the Avian flu virus and control the threat. It starts by explaining the virus and examining the risk, which could become a pandemic with human to human transmission.

- How the virus is transmitted
  - Symptoms of infection
  - Detecting Avian influenza
  - Preventing exposure and transmission with standard contact and airborne precautions
  - Vaccines and treatment
- (18 min) **DuPont #26-HC83-R-DVD.** \$345  
**Handbook Available.**  
**eLearning Format Available.**

### Bloodborne Pathogens For Ambulatory Care: A Sharper Image

Safety devices now include needleless systems and engineered protective devices for needles and other sharps. Studies show that sharps safety devices may significantly reduce your risk of injury during procedures such as joining IV lines, drawing blood, injecting medications and suturing during surgery.

- Covers Hepatitis B and C Virus
  - Transmission and exposure to HIV
  - Hepatitis B vaccine
  - Standard Precautions
  - Personal Protective Equipment
  - Safe Work Practices
  - Sharps Safety
- (19 min) **DuPont #26-HC56-DVD.** \$345  
**Handbook Available.**

### Infection Control Essentials: Every Action Counts

There are many infection control measures, but does your staff know them all? Give them a complete and detailed anti-infection system with this program. It surveys the entire gamut of practices that will help contain the spread of MRSA, VRE, BBPs, and other HAI's in your facility.

**DuPont. #26-HC100-DVD.** \$445

### Bloodborne Pathogens: Bloodbug Barriers

More people are infected with bloodborne diseases than ever before. Hepatitis B, HIV and AIDS remain enormous threats to your workers as patient after patient is admitted to your facility. The course details the effects of the HIV, HBV and HCV viruses, how to use personal protective equipment and engineering controls to minimize the threat of exposure, and safe work practices to employ at all times to avoid transmission and infection.

(23 min) **DuPont #26-HC34-DVD.** \$445  
**Handbook available.**

### Hand Hygiene: For Hands That Care

This program will show you how to protect yourself and your patients through proper handwashing procedures. Includes:

- The Role of Staffing and Infections
  - Hand Decontamination & Handwashing
  - Surgical Hand Antisepsis
  - Hand Hygiene & Glove Use
  - Dermatitis & Hand Hygiene
- (17 min) **DuPont #26-HC68-DVD.** \$345  
**Handbook & Poster Available.**  
**eLearning Format Available.**

### BBP: A Sharper Image

This video offers a concise look at the latest in transmission, treatment and prevention of bloodborne pathogens, specifically Hepatitis B, Hepatitis C and HIV. Gives a run-down on each and how safework practices can reduce the risk of exposure. Sharps safety is thoroughly discussed, as well as post exposure procedures. A Sharper Image will provide up-to-date training for employees who come in contact with blood and other bodily fluids, and those that handle trash and laundry as well.

(19 min) **DuPont #26-HC51-DVD.** \$445  
**Handbook Available.**  
**eLearning Format Available.**

### Behavioral Healthcare

#### Infection Control in Behavioural Healthcare

It's no secret that infections can spread in acute-care facilities. What is not so well known is that mental health facilities can also be breeding grounds for infectious organisms - Nosocomial infection. Infections contracted during behavioral treatment put both clients and staff at risk - and slow down or obstruct therapy. This video addresses infection control concerns at a Mental health facility: Where infectious organisms might be present; Droplet transmission; Hand hygiene; DRO; Sharps; Bites; Signs and Symptoms of Infections; Client Education; Immunization.

(17 min) **DuPont #26-HC66-DVD.** \$445  
**Handbook Available.**

#### BBP In Behavioral Healthcare

This video will teach healthcare workers how to reduce the risk of exposure to Hepatitis C, Hepatitis B and HIV in mental health environments. This program shows situations in psychiatric hospitals with clients and employees, where transmission may occur if safe work practices are not followed. Discusses the importance of PPE, proper handwashing techniques and what to do if exposure occurs.

(19 min) **DuPont #26-HC74-DVD.** \$445  
**Handbook Available.**

#### Hand Hygiene: The Best Medicine

This program covers proper hand hygiene guidelines and explores the prevention of slips and errors that are caused by acting without considering the consequences. The program discusses the following important topics:

- The reasons why we don't wash or decontaminate
- Hand hygiene 101
- How to change behavior

(17 min) **DuPont #26-HC102-DVD.** \$345  
**Handbook Available.**

### Infection Control for Ambulatory Care

In healthcare settings, infections usually spread by droplet, airborne or contact transmission. Today, healthcare personnel break the chain of transmission by following Standard Precautions with all patients. This video program was adapted for ambulatory care facilities and covers how infections are spread.

- Transmission-based Precautions
  - Droplet Precautions
  - Airborne Precautions
  - Contact Precautions
  - Placement Evaluations
  - Work Restrictions
- (18 min) **DuPont #26-HC57-DVD**. \$345

[Handbook Available.](#)

### Tuberculosis: Identification & Control For Non-Isolation

Every healthcare facility needs a TB infection control plan - and every healthcare worker needs to be thoroughly trained in preventing the spread of disease. *Tuberculosis: Identification and Control* is a powerful tool you can put to work immediately - not only for the safety of your staff, but to help assure you meet compliance requirements. Specifically for non-isolation.

(16 min) **DuPont #26-HC91-DVD**. \$445

[Handbook Available.](#)

### Infection Control Orientation

Over the past few years, the risk of infection has increased for both patients and hospital staff. As a healthcare worker, practicing proper infection control procedures is one of your most important responsibilities. This critical program details the sources of infection, transmission and Standard Precautions. (19 min) **DuPont #26-HC35-DVD**. \$445

[Handbook Available.](#)

### Infection Control: Chain Reaction

Designed by infection control experts, this video is filled with the latest information.

The program is comprised of three sections, firstly eight scenarios are shown demonstrating common errors in infection control. Can your audience spot the mistakes? Then an outline of up to date infection control practices. Finally the eight scenarios are revisited showing how these situations should have been handled. Covers staff/patient transmission, needlesticks, aseptic techniques, standard precautions, how infections are spread, work restrictions and much more.

(22 min) **DuPont #26-HC50-DVD-R**. \$445

[Handbook Available.](#)

### Infection Control In Long-Term Care: Protect Your Residents, Protect Yourself

This program can help your staff keep residents in long-term care facilities infection-free. It surveys a whole range of topics: identification of common infections; factors that increase susceptibility to infection; and various practices that can help prevent disease.

(20 min) **DuPont #26-HC112-DVD**. \$295

### Needlestick Prevention: Stick to Safety

Knowing the rules of Sharp Safety can protect your staff from injury. This video program provides a thorough approach to sharps technology, safe handling techniques, and handling and disposing of sharps.

- Facts on HBV, HCV and HIV
- Information on HBV vaccinations
- Five rules of sharps safety & what to do if you receive a needlestick injury

(10 min) **DuPont #26-HC64-DVD**. \$345

[Handbook Available.](#)

[eLearning Format Available.](#)

### Infection Control: Bag Technique

Bag Technique surveys a range of infection control measures such as bag preparation and transportation, work area strategies, hand hygiene, PPE, and procedures for clean-up and disposal. This important training program will teach your staff: The importance of bag preparation; Prevention of contamination; Segregation of "clean" and "dirty" areas; and proper cleanup and disposal measures. (14 min) **DuPont**

**#26-HC104-DVD**. \$295
