

DuPont™ eLearning Suite

LEARNING MANAGEMENT SYSTEM

Deliver, Manage and Track Engaging Learning Experiences

DuPont Sustainable Solutions' powerful, new Learning Management System (LMS) makes it easier for you to assign, administer and document the results of your employees' training from virtually any location around the world. Its enhanced features and capabilities offer you flexibility, customization and ease-of-use. Employees learn what they need to know, and can pace themselves and review material as needed. Managers can easily assign training and track progress and mastery of essential information.

Transfer knowledge and transform performance with the new LMS from DuPont.

Deploy personalized training based on specific employee needs with the LMS.

- Define your specific "Roles" based on "User Permissions."
- Simplify curriculums by arranging courses according to required vs. optional.
- Content delivery can be scaled and customized by prerequisite or sequential order with automated de-selection of questions in modules.
- Centralized administration supports course search/selection filters.
- Deliver system alerts and scheduled reports.
- Reports are available in a variety of formats, tailored to your needs, and presented with graphics and/or data you can filter.

Hosting Services

- We host your e-learning solution, saving you the time and effort of installing and maintaining applications on your company's intranet.
- Enjoy the flexibility of 24/7 access to all courseware and the LMS – ready and available whenever you need it.

Support Services

- Get toll-free access to expert Technical Support 24 hours/day, 365 days a year.
- Plus, you'll always have access to internet-based technical support.

Designed to help you meet and manage your complex training needs more thoroughly and efficiently than ever, our LMS will assist in keeping your company on the leading edge of the training curve.
