Accident Investigation for Everyone

Accident investigation is a key component of an effective safety process, but very few investigations achieve their intended purpose. All too often the focus of an investigation is finding someone responsible for an incident, but it should really be about finding facts, finding real causes and finding the fixes that will prevent the incident from happening again. For an accident investigation to be successful, it must lead to proactive safety improvements and injury prevention.

This program will help everyone involved in an investigation—management, employees and investigators—understand their roles in the process. Viewers will also learn how to recognize common mistakes made during investigations and how to make the right changes that can prevent injuries and improve workplace safety. (23 min) **ERI.**

Incident Investigation Four-Part Series

This four-part training series will assist you in conducting investigations to help reduce incidents at your facility. This series will help fine tune your incident-prevention efforts with information on assembling the investigative team and addressing the facts, factors and root causes of incidents.

Incident Investigation: Getting Started

Help get a solid understanding of how to conduct a thorough incident investigation with the first in this four-part training series. You'll see the purpose and importance of the investigation and why it is imperative in helping to maintain a safer work environment. You'll hear about your role and responsibilities in investigating incidents and find out the eight steps in the incident investigation process. Incident Investigation: Forming An Effective Team And Gathering Information. (18 min) **DuPont.** #26-S516-DVD \$495

Incident Investigation: Analyzing the Facts and Causes

This program shows you how to conduct a root cause analysis to help identify the key factors that contribute to an incident. You'll also see how to follow a line of questioning that can lead you to the underlying causes of an incident to help you determine the systems that need to be strengthened. (18 min) **DuPont.** #26-S518-DVD \$495

Incident Investigation: Forming an Effective Team and Gathering Information

Putting together an effective team to gather information is a key step in the incident investigation process. Without the proper team in place, important details may get overlooked. This program covers how to put together an efficient investigative team made up of personnel qualified to examine every aspect of an incident. You'll also hear conducting interviews using the right types of questions and gathering information that will form the foundation of your investigation. (21 min) **DuPont.** #26-S517-DVD \$495

Incident Investigation: Recommendations, Communication and Follow-Up

The purpose of an incident investigation is to protect precious lives and take steps to prevent an incident from happening again. The final three steps are imperative to preventing any further incidents. Each step is explained in detail:

- Recommend Corrective and Preventive Actions
- Document and Communicate Findings
- Follow Up
