

## Scaffolds: Safety At All Levels

Scaffold-related incidents result in 4,500 injuries and 50 deaths every year. This video covers:

- The role of the competent person
- Pre-assembly inspection
- Assembly
- Pre-shift inspection
- Safe work practices
- Fall protection

(16 min) **DuPont.** #26-S168-DVD \$495  
*Available in French.*

## Trench Box Installation

This program covers safe selection, installation and removal of trench shields and boxes.

- Selection
- Unloading
- Assembly and installation
- Stable soil and unstable soil

(18 min) **DuPont.** #26-S373-DVD \$495

## Installing Trench Boxes

The standard for excavation requires minimum safe work practices and helps to make safe work possible in this hazardous setting. This video program covers safe selection, installation and removal of trench shields and boxes. (18 min) **DuPont.** #26-S133-DVD \$495

## Installing Hydraulic Shoring

Working in and around trenches is dangerous business. One type of trench protection is hydraulic shoring. Hydraulic shoring prevents failure of trench walls, is easy to install, is easily pressure checked and can be used around crossing utilities. Make sure your workers know how to install hydraulic shoring - and use it right. (20 min) **DuPont.** #26-S134-DVD \$495

## Trench Emergency

The fatality rate for trenching is twice the level for general construction. Many who do not die in cave-ins are among the thousands of workers injured or permanently disabled each year. *Trench Emergency* teaches workers what to do when a trench collapses and illustrates the do's and don'ts of a trench rescue. (16 min) **DuPont.** #26-S73-DVD \$495

## Asbestos For Construction

If you're involved in building, demolishing, repairing or maintaining structures, this program will teach you specific information about the hazards of asbestos in construction and will ensure that you go home in as good as shape as when you arrived at work. Topics covered include:  
■ Four asbestos work classes  
■ Exposure assessments and monitoring  
■ Employer respirator program  
■ Controlling exposure  
(15 min) **DuPont.** #26-S311-DVD \$495

## Trenching & Excavation Safety

Live footage and computer graphics provide a clear explanation of the hazards created by digging trenches and excavations.  
■ Hazard reduction: sloping, shielding and shoring  
■ Personal and work safety  
(18 min) **Zomar.** #119-7-DVD \$195

## Trenching-Cave-In Response

Knowing safe response methods for cave-ins can make the difference between life and death, especially for rescuers. Designed for both on-site and rescue personnel, this video examines the basic considerations involved in cave-in emergencies. (24 min) **Zomar.** #119-5-DVD \$195

## Cave In - Trenching And Shoring

This high-impact program will alert your workers to the importance of using proper protection during all excavation work and details proper trenching procedures. Topics covered include:  
■ Evaluating an excavation site  
■ Effective worker protection systems  
■ General safety practices  
■ Emergency response  
(18 min) **DuPont.** #26-S9-DVD \$495

## Pallet Jack Safety (Hydraulic)

This program shows employees how to safely operate one of the most widely-used pieces of material handling equipment found in most workplaces. Because a hydraulic pallet jack or manual pallet truck is a relatively simple piece of equipment, it is easy for employees to underestimate the damage that can be done with improper use. In this program employees learn how to  
■ guesstimate  
■ the weight of a load if that information is not readily available in order to keep from over-loading a truck  
■ Proper load lifting and load moving techniques are also demonstrated.  
(8 min) **VTSI.** #49-S8-DVD \$195

## Backhoe Loader Pre-Start Inspection

Begin at the beginning. A good daily pre-start inspection helps keep the machine running reliably all day long. And a good inspection means more than pulling the dipstick and kicking the tires. Many operators have never been taught what they really need to look for. This 12 minute video provides an organized way to check out the machine before putting it to work. (12 min) **VISTA.** #80-4-DVD \$111

## Backhoe Loader Safe Operating Techniques

Lots of people can drive a backhoe loader. A few people can operate one. And the best of the best operate smoothly and safely. This 14-½ minute video provides tips on how to operate smoothly and safely in a wide variety of work conditions with several different attachments. (14 min) **VISTA.** #80-5-DVD \$149

## Backhoe Loader Operator Maintenance And Transport

Some good operators have died or been seriously injured making avoidable mistakes during maintenance or transportation of their machine. The lessons in this video were taken from real-life situations. Here's a chance to learn from the sometimes deadly mistakes of others in an intense 9 minute video. (9 min) **VISTA.** #80-6-DVD \$111

## Backhoe Safety

This video provides essential safety information for anyone who operates or works around backhoes. It stresses:

- Importance of 3-point contact
- Loading and unloading
- Watching for traffic and pedestrians

(18 min) **Zomar Productions.** #119-1-DVD \$195

## Crawler Excavator Pre-Start Inspection

Whether you call it the dipper or the stick, the tool or the bucket, the lower or the undercarriage, you need to know what you are really looking for when you do a pre-start inspection. In only 13 minutes, less time than it takes to do a good walk-around, operators will learn to look for things they never thought could give them trouble. (13 min) **VISTA.** #80-1-DVD \$99

## Crawler Excavator Safe Operating Techniques

There are safe operating techniques to use in sewer work, road construction, heavy traffic, clinging to a mountainside, taking down a bridge at night or working in a scrap operation. (18 min) **VISTA.** #80-2-DVD \$136

## Crawler Excavator Operator Maintenance And Transport

Tips on safe transport can keep you from accidentally paying for repairs on a bridge, and help your business be more profitable. Your insurance company will love you for buying this video. (12 min) **VISTA.** #80-3-DVD \$99

## How Attachments Improve Backhoe Versatility

Innovative attachments (50) are featured in this video. This could be the most important 15 minutes a specification writer will spend. The video will open everyone's eyes when they discover just how much more they can get from their backhoe investment. (15 min) **VISTA.** VHS #80-28 \$86

## Motor Grader Safety: Maintenance And operation

Includes topics such as pre-start walk around and daily service on machine, operator's station with its controls and safety system and safety tips when operating the machine. Produced by John Deere, but applies to most equipment. (33 min) **VISTA.** #80-68 \$149

## Construction Electrical Safety: Current Control

The electricity coming into a construction site can be dangerous – even deadly. This program will help train construction workers in the safe way to work around electricity and covers protective devices and safe work practices.

- Recognizing hazardous conditions
  - Understanding bonding and grounding
  - Using tools and temporary wiring properly
  - Misusing power supplies, extension cords and tools
  - Poor housekeeping
  - Working on electrical systems without qualification and proper protective gear.
- (11 min) **DuPont.** #26-S323-DVD \$295

## Log Yard Conveyor Safety

Log yard conveyors are so powerful and effective at moving large volumes of material that we don't even notice them. Power combined with many moving parts can create a hazardous situation. Accidents summaries, Importance of guards, Lockout / Tagout, Safety tips. (13 min) **VISTA.** #80-43 \$244

### Wheel Loader Walk-Around And Introduction

The first step in safe operation of any piece of equipment is knowing it's in good working condition. This video walk-around shows operators how to look for more than fluid levels and leaks. But more importantly - it tells them why, and what can go wrong if they miss something. Watching an industrial tire explode leaves a lasting safety impression. Knowing when, how and why to drain the moisture out of an air tank can help avoid an accident. (15 min) **VISTA**.

#80-9-DVD \$124

### Wheel Loader Operating Techniques

Recovering from a slide on a side hill, how to avoid slipping into an open excavation, safe road travel, trailer transport techniques, undercutting a bank, truck loading from stockpiles, loading hoppers, operating near high speed traffic or pedestrians, night operations, buried utilities and dozens of other real world operating situations are covered in this fast-paced video. Every wheel loader operator will be glad they watched it. (23 min) **VISTA**.

#80-10-DVD \$244

### Emergency Response For Off-Road Heavy Haul Trucks

A popular advertising slogan says "The Best Surprise is no Surprise." Being surprised by an emergency situation in an off-road heavy haul truck can be deadly. This video, over a year in the making and developed with direct help from CATERPILLAR, TEREX, and KOMATSU, teaches operators to respond quickly and decisively to emergency situations. (30 min) **VISTA**. #80-13-DVD \$136

### It Always Happens To The Other Guy

A video using professional Hollywood stunt men in construction equipment roll-over accidents. Produced by John Deere with assistance from the National Safety Council. The video makes construction equipment operators take stock of the dangers they face every day on the job. (20 min) **VISTA**. #80-27 VHS \$86

### Safe Use Of Hydraulic Breakers, Shears And Crushers

This video was designed to help all demolition tool users work more efficiently and safely. How to get the most from your breaker, shear or crusher, while working safely, is the point of this visually accurate video. There is something for every user of demolition equipment to relate to with the wide variety of scene locations provided. Advice on how to get the most from your attachment investment makes the purchase price a real bargain. (17 min) **VISTA**.

#80-7-DVD \$111

### Manbaskets In Construction

Manbaskets are only permitted whenever conventional means of reaching work sites would be more hazardous or not feasible - for example, if it would be unsafe to use scaffolds or ladders. This video focuses only on baskets designed to hoist personnel and was shot in cooperation with Lifting Technologies Inc. (10 min) **DuPont**.

#26-S63-T13-DVD \$495

### Safe Conveyor Operation (Aggregate Operations)

Conveyors are one of the most efficient methods ever invented to move material. Conveyors can also kill and maim. This video will help people who must work around conveyors do their job safely. Interviews with experienced aggregate operation supervisors reinforces powerful visuals to teach safety around conveyors. Watching an effective lockout/tagout procedure teaches employees the how and why of proper lockout/tagout and employee communications. Losing a limb or life can be avoided with good training. This video effectively supports your safety training presentations. (12 min) **VISTA**. #80-11-DVD \$136

### Conveyor Maintenance Safety (Aggregate Operations)

Head pulleys, tail pulleys, carrier rollers, drive motors, automatic tensioning devices, scalpels and belt alignment all present their own form of danger. Now there is a video designed to help your employees understand how to avoid the dangers of working around these components. (15 min) **VISTA**. #80-12-DVD \$136

### Haul Truck Pre-Start Inspection - Making It Safe

Knowing what to look for, and where to look are critical to safe operation. Operators need to know what appears to be a minor failure, like a pin-hole leak in a hydraulic line, can become a major problem in a single shift. If that pin-hole sprays vaporized fluid onto a hot exhaust surface, all of the elements needed to start a flash fire are present. (15 min) **VISTA**. #80-15-DVD \$136

### Dozer Safety, Maintenance and Operation

Designed to supplement an operators manual, the video covers the Pre-Start Inspection, Operators Controls and Safety Devices, and Safe Operating Tips. Safety information applies to all brands and all size dozers. Two versions available: Hydrostatic Drive models and Torque Converter & Direct Drive models.

#### Two versions available:

Hydrostatic Drive models:

#80-29C VHS \$86.

Torque Converter & Direct Drive models:

#80-29G. VHS \$74 (26 min) **VISTA**.

## VEHICLE & EQUIPMENT INSPECTION CHECK-LISTS

made  
*Easy, Simple, Quick & Convenient!*

### EASY

- ✓ Check-List Design & Layout helps you PERFORM Inspections EASIER
- ✓ 150 Inspection Check-Lists in Each Book/Pad (6-7 mo. supply for single shift operation)
- ✓ Easy to USE, MANAGE, STORE, CONTROL, FILE, ACCESS & REVIEW

### SIMPLE

- ✓ 2 COPY Carbonless forms
- ✓ 1 PERMANENT Copy stays in the book
- ✓ 1 TEAR-OUT Copy to Circulate
- ✓ Always REMINDS Employees of WHAT to CHECK
- ✓ STANDARDIZES Inspections

### COST EFFECTIVE

**Only Pennies per Inspection**

Multiple discounts available.

### QUICK

- ✓ Quick to use and perform Circle-Check inspections by Personnel
- ✓ Locate Check-List items quickly
- ✓ Identify DEFECTS INSTANTLY
- ✓ Provides instant COPY & RECORD
- ✓ TIME-SAVER Design & Layout

### CONVENIENT

- ✓ ELIMINATES Lost or Loose Inspection Records
- ✓ 1 Inspection Record COPY STAYS in the BOOK
- ✓ Book MOUNTS and STAYS WITH the Vehicle or Equipment
- ✓ IMPROVES Vehicle & Equipment SERVICE & REPAIR by making Inspection Info & Defects Readily & Conveniently Accessible
- ✓ WEATHER Resistant, Durable STORAGE Pouch (optional)

### Inspection Checklists available for:

- Counterbalance Lift Trucks, #25-1-001
- Counterbalance Clamp Trucks, #25-1-002
- Narrow Aisle Lift Trucks, #25-1-003
- Narrow Aisle Hand Trucks, #25-1-004
- Mobile Cranes & Boom Trucks, #25-1-005
- Bridge, Jib, Gantry Cranes & Hoists, #25-1-006
- Electric Battery & Charging Area, #25-1-007
- Propane Filling Equipment & Area, #25-1-008
- Propane Cylinders - Storage, Inspection, Use & Receiving, #25-1-009
- Compressed Gas Cylinders, #25-1-010
- Elevating/Aerial Work Platforms, #25-1-011
- Skid Steer Loader Equipment, #25-1-012
- Backhoe Loader Equipment, #25-1-013
- Excavator Equipment, #25-1-014
- Wheel Loader Equipment, #25-1-015
- Grader/Plow Equipment, #25-1-016
- Dozer Equipment, #25-1-017
- Rough Terrain Telescopic Handler Equipment, #25-1-018
- Personnel & Burden "Utility Carrier" Vehicles, #25-1-019
- Sweepers & Scrubbers (Ride-on & Walkie types) , #25-1-020
- Workplace/Worksite Instant Reporter (3 copy form) , #25-1-021
- Mobile Railcar Movers, #25-1-022
- Ice Resurfacing Machines, #25-1-023
- Tractor-Trailer Vehicle Inspection, #25-1-200
- Tractor-Flatbed Trailer Vehicles, #25-1-201
- Dumptruck/Hauler Vehicles, #25-1-202
- Truck/Equipment Transport Vehicles, #25-1-203
- Tanker Truck/Trailer Vehicles, #25-1-204
- Stake/Flatbed Truck Vehicles, #25-1-205
- Stake/Flatbed/Boom Truck Vehicles, #25-1-206
- Cargo/Cube Truck/Van Vehicles, #25-1-207
- Utility/Bucket Truck Vehicles, #25-1-208
- Fleet Vehicles - Cars, SUV's, Van, Pick-up Trucks, Trailers, #25-1-209
- Fleet Vehicles - Cars, SUV's, Van, Pick-up Trucks, Trailers (Hand Size Version), #25-1-210

### Greater Excavator Versatility

Excavators are used for more than just digging trenches and setting pipe. This video shows several non-traditional applications including recycling operations, demolition, scrap-handling, truck loading and more. (11 min) **VISTA**. #80-31 VHS \$86

### How To Get More Out Of Your Motor Grader

Every municipality that owns a motor grader wants to find additional ways to capitalize on the investment. This video demonstrates road maintenance and road building techniques many grader operators never believed possible. (25 min) **VISTA**. #80-32 VHS \$86

### Taking Control Of Your Motor Grader

Modern motor grader controls and functions are shown in this video designed to improve operator skills. (19 min) **VISTA**. #80-33 VHS \$86

### Handling Structural Steel

Shows correct techniques for maximum load stability during transport to a job site. The dangers of improperly chained loads, incorrect load binder use and how to safely release binders, rigging techniques for unloading, sorting and shaking-out at the job site are graphically displayed. Emphasis is placed on how to rig specific loads. (28 min) **VISTA**. #80-26-DVD \$186

### Pipelayer

The first part of the video provides viewers instruction in the essential items that should be inspected or serviced periodically. This basic information is intended to help all pipelayer operators understand the importance of what to look for and why inspection is vital to safety, reliability and productivity. The second part covers basic safe operating techniques in five distinct pipeline applications. (33 min) **VISTA**. #80-25-DVD \$156

### Construction Fall Protection

According to recent statistics, falls in the workplace account for almost 10% of all fatal occupational injuries. This comprehensive program effectively instructs both employee and employer on the hazards of falling, important measures, and much more. (12 min) **CLMI**. #39-CFP-DVD \$395

### Contractor Safety General Requirements

When it comes down to it, the host employer is ultimately responsible for making sure workers are trained properly. *Contractor Safety: General Requirements* will help train all workers on specific safety regulations and could help your organization avoid catastrophic accidents. (20 min) **DuPont**. #26-S347-DVD \$495

### Confined Space For Construction

Produced in conjunction with National Utility Contractors Association, this video covers working safely in a confined space. Preparation begins with this overview.

- Identifying confined spaces and their hazards
  - Topics for the entire excavation crew to be aware of
  - Duties of confined space entry team.
- (16 min) **VISTA**. #80-74-DVD \$271

### Highway Work Zone Safety: The Basics

This video program will help your employees understand and learn what it takes to keep themselves, drivers and pedestrians safe.

- Being safety conscious
  - Traffic control devices
  - Slowing down traffic
  - Detours and closures
  - Communication
- (18 min) **DuPont**. #26-S211-DVD \$495

### Seeing Is Believing - Safely Exposing Buried Utilities

Knowing the colors and meaning of utility markers is only part of the answer to safe, damage-free digging. Physically exposing buried utilities in a safe, efficient way is absolutely vital to any installation or repair. Learn the most efficient and cost effective means through this video. (23 min) **VISTA**. #80-35-DVD \$186

### Hard Hat Safety Series

**This series of short videos was created specifically for construction workers.** The complete "Hard Hat Safety Series" includes nineteen video programs - each ten minutes long. Though not designed to provide the extensive training of **DuPont's** full-length programs, this series provides fast-paced training tailored to the needs of construction workers. The series includes:

- Construction Forklifts
  - Construction Fall Protection
  - Confined Space Entry
  - Trenching & Shoring
  - Lockout/Tagout
  - Back Safety
  - Stairways & Ladders
  - Welding Safety
  - Substance Abuse Prevention
  - Electrical Safety
  - HazCom for Construction
  - Warning Labels & Signs
  - Process Safety
  - Scissor Lifts
  - Boomlifts
  - Manbaskets
- (10 min each) **DuPont**. #26-S63-DVD \$495 ea.

### Hand Signals For Construction Equipment

This video shows the SAE hand signals in use with various types of construction equipment in a clear concise manner. Comes with a handy pocket reference.

- Visual use of the hand signals published as SAE J1307
  - Verbal explanation of the correct use of established hand signals
  - How the machine operator responds to clear signals
  - The effect of hand signals on safety
  - Situations where hand signals may be the best form of communication.
- (10 min) **VISTA**. #80-34-DVD \$124

## Lockout/Tagout Of Construction Equipment

Working safely on and around mobile construction equipment requires following manufacturers advice to avoid unplanned motion of the machine and its parts. (25 min) **VISTA.** #80-21-DVD \$161

## Traffic Control Thru Work Zones

With the emphasis on worker safety, this video shows how to safely set up traffic control for short-term jobs. Clear and simple demonstrations explain step-by-step installation of the equipment used to create the five parts of any work zone used to safely control traffic. (21 min) **Zomar.** #119-3-DVD \$195

## Transporting Construction Equipment Loading & Transporting Equipment Safely

This program addresses correct loading, tie-down, transport and unloading of different types of heavy equipment on all types of trailers including tag-alongs, detachable goose necks, beaver tail, and fixed neck lowboys. Eighteen different types of equipment are addressed.

- Knowing the trailers rated capacity
- The importance of correct trailer placement prior to loading
- Snow, wet, muddy loading and unloading situations
- Dangers of loading tracked equipment
- Chain types and restricted use of tie-down chain

(37 min) **VISTA.** #80-76-DVD \$369

## Powered Haulage Night Operations

A dynamic 10 minute video highlighting the special dangers in operating mining equipment after dark. The video points out that night vision is diminished even more in people who smoke. Created by a mining company to help other miners improve safety in mines that are using powered haulage equipment in multi-shift operations. (10 min) **VISTA.** #80-14-DVD \$136

## Road Safety Crew: Safe Practices For Road Construction And Paving Crews

This video is dedicated to the equipment operators, labourers, truck drivers and traffic controllers involved in highway paving work. Safety on and around the equipment as well as safety in traffic work zones is the focus of this video. (23 min) **VISTA.** #80-22-DVD \$244

## Safe Use Of Hand Held Cut-Off Saws

This video, produced with the help of the world's leading manufacturer of cut-off saws, tells it like it is. Videotaped on working job sites in many applications, the straightforward dialogue will explain the safest and most effective methods of operation. Learn how to extend saw and blade life, which blade types to use on different materials, saw limitations, safe applications for gas, electric, hydraulic or air powered saws and even how to hold the saw to avoid injury. (13 min) **VISTA.** #80-19-DVD \$86

## Safe Operation Of Electric Drive Mine Haul Trucks

This video was taped in some of the largest high production mines in North America using real operators in their normal day-to-day, and nighttime operations. Every scene teaches an important safety lesson. (28 min) **VISTA.** #80-24-DVD \$136

## Snow Removal Techniques - Plowing Tips From The Pros

This video instructs snow plow operators from pre-trip inspection to post-trip report, including the techniques and dangers in between. Videotaped with the help of Canadian Provincial Departments, this video shows equipment saving techniques that can be put to work instantly. Show it to every plow operator at the start of each winter - it will pay for itself the first time you show it, and return dividends for years to come. (20 min) **VISTA.** #80-20-DVD \$186

## Safety Training For Repair Technicians

Nearly 65 percent of repair technician personal injuries involve HANDS, EYES or BACKS. Now a 21 minute video examines all types of repair related accidents, and shows effective ways to prevent them. (21 min) **VISTA.** #80-17-DVD \$161

## Right-Of-Way Mowing Safety

This video should be seen by every operator of a mowing tractor. Filled with practical advice on ways to avoid accidents for mower operators, bystanders and the driving public. Part one provides easy-to-follow pre-start inspection and maintenance advice. Part two puts you in the operator's seat in all types of mowing applications. A must see video for new and experienced operators alike. (23 min) **VISTA.** #80-18-DVD \$186

## Roadway Worker Safety: In the Zone

Roadway work is full of potential hazards — from passing traffic and trenches to electrical wires and hearing loss. Help reduce injuries and fatalities with this vital training program.

- Roadwork hazards
  - Flagging
  - Night-work operations
  - PPE
  - Special training
  - MSDS
  - Traffic Control Pattern Awareness
- (24 min) **DuPont.** #26-S418-DVD \$495

## Videos specifically for the Forestry Industry

The safety videos on these two pages have been specifically designed to deal with the hazards of working in the forestry industry.

### Log Yard General Safety

A must have for every log yard. Many hazards exist in a log yard – some obvious and some not. Real experiences coupled with a visual summary of key safety topics helps all personnel understand and commit to memory the everyday dangers they may encounter.

- Pedestrian safety (Tail swing, alarms)
  - Equipment blind spots & pinch points
  - Chipper and saw safety issues
  - Rail car chocking and bump up
- (14 min) **VISTA.** #80-41-DVD \$244

### Log Yard Knuckle Boom Loader Safety

From sorting, stacking and decking to loading and unloading rail cars and trucks, this video reminds log yard knuckle boom loader operators that how they operate their rig affects both productivity and the safety of other personnel. Ten real life tips to live by are visually shown.

- Pre-operation inspection & PPE
  - Moving the equipment & work surfaces
  - Load capacities & wet conditions
  - Accident summaries
- (19 min) **VISTA.** #80-44-DVD \$244

### Dozer Safety—Bark & Chip Pile Management

From building beams and dealing with steam from the pile at night to managing the age and temperature of the material fed into the reclaimer, this video helps bark & chip pile dozer operators visualize and remember key productivity and safety issues.

- Road building on the pile
  - Feeding the reclaimer
  - Pile management
  - Operating tips from pros
- (19 min) **VISTA.** #80-48-DVD \$244

### Forklifts And Pedestrians: Safety Awareness

It can be dangerous to work around forklifts. Almost 80% of forklift accidents involve a pedestrian. This video helps both operators and pedestrians understand why these accidents occur and procedures to help avoid them.

- Avoid shortcuts
  - Marking the work area / tail swing
  - Operator / pedestrian communication
  - 10 tips from experienced operators
- (8 min) **VISTA.** #80-50-DVD \$124

### Haul Unit & Log Trailer Safety

With a focus on pre-operational inspection and safe operation, this video reminds new and experienced operators that it's easy to take safety for granted.

- Yard traffic / debris
  - Trailer tip-over
  - Trailer connection / release
  - Changing conditions / seasons
- (11 min) **VISTA.** #80-46-DVD \$124

### Roll Stock Handling, Damage Prevention & Safety

The focus of this two-part video is roll stock (paper) damage prevention and safety.

- Tips from experienced operators and real experiences enhance the delivery of key messages to operators handling roll stock.
- Damage reduction tips
  - Dock locks and wheel chocking
  - Pedestrians and visibility
  - Summary of 7 tips to live by
  - Inspecting and loading trailers and box cars
- (23 min) **VISTA.** #80-49-DVD \$244

### Large Capacity Forklift—Inspection & Maintenance

Pre-operation inspections are important for all heavy equipment. An impending equipment failure can quickly create a dangerous situation for the lumber yard operator or nearby people.

- How to complete a pre-operation inspection
  - What to inspect
  - Equipment capacities
- (9 min) **VISTA.** #80-52-DVD \$124

### Large Capacity Forklift Operation—Lumber Yard

Without knowledge of what CAN happen, easy to operate large capacity rough terrain forklifts can quickly become dangerous to people both inside and outside the operators cab. This video combines the tips and experiences of real lumber yard operators with practical safety advice.

- Real accidents highlighted
  - Pedestrian and equipment traffic
  - Design and operating capabilities
  - Center of Gravity & safe load transport
  - Night operations & working on slopes
- (23 min) **VISTA.** #80-51-DVD \$244

### Large Capacity Forklift Operation—Indoor

Filmed indoors and outside at a wood processing plant, this video promotes safe operating techniques. Even seasoned operators will be reminded of the dangers associated with this equipment.

- Trailer / box car loading
  - Tail swing / overhead clearances
  - 8 TIPS for safe, productive operation
  - Pick up / transport / delivery of large loads
- (19 min) **VISTA.** #80-53-DVD \$244

### Tips From The Pro's: Wheel Loaders

What can we learn from each other? Some operating techniques may become unique to a work group simply because no one has taken these TIPS to another work group.

This DVD offers TIPS related to:

- Inspecting the machine & the jobsite
  - Planning the job
  - Machine adjustments
  - Material handling techniques
  - Trench back-filling techniques
- (17 min) **VISTA.** #80-66-DVD \$186

### Sliding Boom (Telescopic) Forklift Operating Techniques

Operators of this equipment are subject to some difficult conditions. From rough terrain and people on the job site to proper hand signals and avoiding power lines, this video is a great summary of ten rules to live by.

- Importance of Load Charts
  - Center of Gravity - avoiding tip overs
  - Roading the forklift and hills
  - Steering options and leveling the load
- (18 min) **VISTA**. #80-54-DVD \$186

### Safe Operation of Scissor and Boom Lifts

Elevated work platforms such as scissor and boom lifts allow us to safely perform various tasks and maintenance operations at heights that otherwise may be unreachable. While there are many different styles of lifts designed for various applications and site conditions, they all have one thing in common: the potential for serious injury or death when operated in a careless manner. Electrocutation, falls, crushed body parts and tip-overs are just a few examples of incidents that often result from unsafe operation. This video discusses the procedures lift operators must follow to prevent these types of incidents. Topics include factors that affect stability, pre-operational inspection, protecting against falls from platforms and safe driving procedures.

(19 min) **ERI**. #48-2480-DVD \$495

### Skid Steer

It's easy to classify the skid steer as a simple machine to operate. But when you're talking safety, it's simplicity is its downfall. Anyone can quickly create a dangerous situation for the operator or nearby people. Applies to most work locations – indoor and outside. Purchase both for \$235

### Pre-operation Inspection - Video 1

- How to complete an inspection
  - What to inspect
  - Skid Steer capacities
  - Work situations and other workers
- (12 min) **VISTA**. #80-47-T1-DVD.

### Safe Operating Techniques—Video 2

- Blind spots and backing
  - Weather (mud / snow)
  - Safe hauling (terrain and slopes)
  - Ten tips from experienced operators
- (14 min) **VISTA**. #80-47-T2-DVD.

### Bucket Trucks: Extending Your Safety

Bucket trucks make working at high elevations easier but if they are not operated safely, major accidents can occur. Use this vital program to keep your bucket truck operators safe. Covers: operator training, pre-start inspection, PPE, and electricity. Handbook available.

(15 min) **DuPont**. #26-S325-DVD \$495

### Stealing From Thieves: Equipment Theft Prevention

Construction jobsites are a common target for thieves. Equipment is usually parked in remote locations, easy to start, and worth a lot more than the average car.

- How thieves work
  - Tips - how to prevent theft
  - Implementing a prevention program
- (20 min) **VISTA**. #80-75-DVD \$137

### Chain Saw Safety

This 15-minute video shows how to safeguard against disabling injuries. Interviews with industry professionals combined with "how-to" demonstrations make this video an excellent safety tool for your organization. (15 min) **Idea Bank**. #110-S6-DVD \$295

### Log Yard (Grapple) Front-End Loader Safety

Stacking and decking logs with a grapple can lead to dangerous situations in wet or dry log yards. Knowing your machine is only part of maintaining a clean safety record. From loading and unloading rail cars to wet or uneven terrain, the need for safety never takes time off.

- Pre-operation inspection
  - Center of gravity
  - Loading / unloading & binding
  - Trailers and rail cars
  - Safe operating tips
- (24 min) **VISTA**. #80-42-DVD \$244
