

## Working Around Forklifts A Pro-Active Approach

Always behave as if an accident might happen... this is the key to working safely around forklifts. This video program helps motivate employees to take this lesson to heart and explains how and why special precautions are necessary.

- Inherent hazards of forklifts
- Precautions when turning
- Mechanics
- Visibility and warning devices
- Parking

(16 min) **DuPont.** #26-S45-T5-DVD \$495

## Forklift Case Histories Serious Business

Perhaps nothing emphasizes the significance of this video program better than the beginning of the program itself: "This training program presents re-enactments of four actual accidents which occurred on or around forklifts and walkies. Your life may depend on learning from the mistakes of these victims." Ideal for training and re-training.

- Securing the platform and load
- Safe forklift speed and turning
- Working safely around forklifts and pallet trucks

## Forklift Safety Real, Real-Life®

Each year over 100 workers are killed, and almost 95,000 others experience serious injuries in forklift accidents. Taking the time to practice safe forklift operating procedures can protect workers from painful injuries and financial loss. This program, part of our dynamic **Real, Real-Life® Series**, will help you and your employees avoid permanent, life-threatening injuries.

- Awareness, Attitude, Action
- The walk-through inspection
- Forklift physics
- Loading safety and balancing a load
- Testing your knowledge

(20 min) **DuPont.** #26-S256-DVD \$495

## Forklift Handling Safety In Dangerous Situations

Sometimes operators must handle forklifts in dangerous situations. This crucial video program will help operators avoid accidents by reviewing special techniques for special situations.

- Slippery surfaces
- Heavy traffic areas and loading docks
- Inside trailers/ramps

(15 min) **DuPont.** #26-S197-DVD \$495

## Powered High-Lift Trucks Order Picker Safety

If you have order-pickers in your warehouse, this video is for you. It discusses safety issues for those working with and around powered high-lift trucks.

- Operating conditions
- Tie-offs/fall protection
- Tipovers

## Operating Reach Trucks Safely

Reach trucks are a critical part of many material handling operations, as they can move loads of material smoothly and efficiently in areas too tight for traditional forklifts. As useful, powerful and critical as they have become, reach trucks can also be dangerous when operated in an unsafe manner. Operators must have a good safety attitude and commitment to responsible operation to prevent injuries and property damage. This program discusses common hazards presented by the operation of reach trucks and how to control those hazards through safe operating techniques. Topics include reach truck stability and handling characteristics, pre-operational inspection, lifting and moving loads safely, avoiding tip-overs, and traveling on sloped surfaces. Safe driving techniques, preventing injuries to pedestrians, lifting personnel safely, parking the truck and working in and around trailers and railcars are other addressed issues. ### POWERED INDUSTRIAL TRUCK SAFETY

This newly expanded line from **CLMI** will help you meet the training requirements of powered industrial trucks. All programs provide scripted training, training tips and participation exercises to evaluate worker knowledge.

#### Forklift Safety

This award-winning program focuses on the most common type of equipment - the sit down, counter balanced forklift. Both experienced and first-time operators will find this comprehensive training useful. (12 min) #39-FOR-DVD \$395

#### Order Picker Safety

Order pickers are used in many storage environments, and are especially dangerous because the operator goes up and down with the load. This program focuses on the best safety practices specific to this piece of equipment, including the use of fall protection. (9 min) #39-OPS-DVD \$395

#### Powered Pallet Jack Safety

The powered pallet jack is of particular concern due to its simple appearance. Many assume they know how to operate it, but it's unique maneuvering and weight place the operator at risk of injury. We focus on the safe operation of both the walkie style and walkie-riders. (8 min) #39-PPJ-DVD \$395

#### Reach Truck Safety

This equipment's flexibility makes it more important to understand how to evaluate rated capacity, pick and place loads and clear racking. These trucks have an articulated carriage that can reach, tilt and shift from side to side requiring the operator to have a greater understanding of safe usage. (8 min) #39-RTS-DVD \$395

#### Lift Truck and Pedestrian Safety

Pedestrians and lift truck operators have a team responsibility for each others' safety. By observing safe work practices and forklift operating procedures, workers can avoid most lift truck accidents. This program shows several near-miss accidents that illustrate the importance of following safety practices for the forklift operator and the pedestrian. (14min) **ERI**. #48-9214-DVD \$595

#### Powered Low-Lift Trucks: Walkie & Walkie/Rider Safety

This video goes over training for operators of trucks commonly called walkies and walkie/riders. They are transporters, pallet trucks and platform trucks.

- Characteristics
- Load handling
- Pedestrian traffic
- PPE

(19 min) **DuPont**. #26-S406-DVD \$495

#### Operating Electric Pallet Jacks Safely

Electric pallet jacks, often called pallet trucks, are designed for lifting and transporting palletized materials over relatively short distances. They come in many different types and styles and are vital to daily operations in today's industry. Even though they seem simple to use, they can be very dangerous when used by an untrained operator or in an unsafe manner. This program discusses how to safely operate electric-powered pallet jacks so operators can deliver their loads while avoiding injury and property damage. Topics include pre-operational inspection, driving and handling characteristics, lifting, moving and placing loads, avoiding incidents involving pedestrians, traveling on sloped surfaces and working on loading docks. (15 min) **ERI**. #48-2474-DVD \$495

#### Handle With Care: Forklift Safety

This program is designed to provide your employees with the equipment-specific training needed to comply with your powered industrial truck standard. Handle With Care: Forklift Safety Training will educate your employees on the most common type of equipment - the sit down, counter balanced forklift.

Your employees will learn:

- How to correctly inspect their forklift
- Forklift stability and to prevent tip-over
- Safe operation of a forklift
- How to safely load and unload trailers. (20 min) **CLMI**. #39-FLS-DVD \$395

#### Forklift Safety

This video gives viewers a solid overview of forklift characteristics and safe forklift operation. It's a fast-paced program featuring several dramatic re-enactments of typical forklift mishaps. The Larry character is also featured, and you can only imagine some of the mistakes he makes - mistakes that viewers can learn from. The program covers the following material:

- Forklift handling, stability and load limits
- Understanding your forklift, forklift inspection, refueling and recharging
- Picking up and placing loads, including elevated loads
- General safe driving guidelines, operating around pedestrians and other forklifts. (20 min) **Aurora**. #47-S22-DVD \$399

#### Forklift Operator Training

This fast moving video will ensure you meet all training requirements and covers the following:

- Vehicle capacity and stability
- Load stability
- Steering and maneuvering
- Vehicle inspection and maintenance
- Operator training and authorization
- Pedestrian traffic (17 min) **ERI**. #48-9818-DVD \$495

### Forklift Basics: Safe From the Start

This program provides details on the powered industrial truck, from the way it's constructed to the way it works. It will help your operators understand the factors that affect forklift balance and maneuverability.

- Powered industrial trucks
  - Design and controls
  - Pre-use inspection
  - Operator's manual
- (22 min) **DuPont**. #26-S341-DVD \$495  
*Available in French*

### High-Impact Forklift Operator Training

The eight forklift accidents re-created in this video will show your employees the life-threatening consequences of unsafe lift truck operation.

- Causes of forklift accidents
  - The stability triangle
  - Pre-operational inspection
  - Dangers of sloped surfaces
  - Lifting and moving loads
- (19 min) **ERI**. #48-9812-DVD \$495

### More High-Impact Forklift Safety

This video contains graphic re-creations and mishaps. Operators who view this program will never forget the valuable safety lessons it contains! Forklifts are so diverse and powerful that they allow us to carry practically anything and place it almost anywhere. Along with that ability, we as operators also carry a large amount of responsibility. We must be responsible not only for the proper operation of our truck and delivery of our load, but also for our safety while driving and the safety of anyone in our path. This powerful video shows how unsafe forklift operation leads to injuries, deaths and property damage. (22 min) **ERI**. #48-2440-DVD \$495

*Non-Graphic Version Available.*

### Forklift Maneuvers: All the Right Moves

This program reviews the most important forklift safety issues - from operating conditions to load manipulation. With this important information, your drivers will be equipped to operate safely and avoid accidents.

- Operating conditions, loads and stability
  - Lifting people
  - Hazardous operating conditions
- (26 min) **DuPont**. #26-S342-DVD \$495

### Operating Order Selectors Safely

Order selectors, sometimes called order pickers, allow us to move materials, supplies and merchandise to and from storage areas more efficiently than ever before. Like all other powered industrial trucks, they can be extremely hazardous if safe work practices are not followed. Operators of order selectors have a responsibility to operate them in a safe manner at all times. This program examines some common hazards posed by the operation of order selectors and how to control these hazards through safe operating practices. Topics include order selector stability characteristics, pre-operational inspection, lifting and stacking materials properly, fall prevention, safe traveling techniques, preventing injuries to pedestrians and properly parking the vehicle.
