

### Welding Safety: Safe Work With Hotwork

Hotwork operations play a big part in many operations. This important program details various types of welding and discusses vital safety precautions.

- Personal hazards
  - Hazardous fumes and substances
  - Equipment safety
- (18 min) **DuPont.** #26-S207-DVD \$495  
*Available in French*

### Welding Safety: What You Need To Know

This video program discusses the essentials of welding safety with a focus on oxyfuel gas cutting.

- Safe operation procedures
  - Proper safety equipment
  - Making the work environment safe
- (10 min) **DuPont.** #26-S493-DVD \$495

### High-Impact Welding Safety

Welding and cutting operations are extremely dangerous and require an unyielding commitment to personal safety. This high-impact video re-creates six accidents that illustrate the horrible consequences of not following safe welding rules and procedures. Your employees will be reminded that they must follow all safety rules to protect themselves from serious injury or death.

- Gas and arc welding safety
  - Fire watches and fire prevention
  - Handling and storing cylinders
  - PPE and protective clothing
  - Welding in confined spaces
  - Preventing metal fume fever
- (19 min) **ERI.** #48-9721-DVD \$495

## WELDING SAFETY SERIES

This series will help welders avoid health hazards, accidents and injuries. It details the principles of welding safety and provides specific procedures for cutting and confined space hotwork. **DuPont.**

### Confined Space Hotwork

- The hotwork permit
  - Special safety equipment
  - Fire watch
  - Emergency rescue
  - Handbook available.
- (20 min) #26-S17-T2-DVD \$495

### Oxyfuel Gas Cutting

- Proper safety equipment
  - Hook-up procedure
  - Ventilation
  - Preventing spark and spatter
- (13 min) #26-S17-T3-DVD \$495
